RNADesignAgent: a calibrated, tool-first agent for RNA design

Multi-agent execution layer (L4) - each contribution measured

The platform at a glance (2026-08-19 state)

4,419 successful / 111 failed tool calls; 1,217 gate decisions

42	21	11
tools	local services	workflows

210	5,747	5,747
benchmark tasks	audit events	lines, append-only

Calibrated agency: evidence gating (CapGate) + constraint navigation (GenNav)
